SUMMARY

Full Stack Developer with nearly 5 years of experience in designing and developing scalable web and mobile applications using Core PHP, Laravel, CodeIgniter, ReactJS, VueJS, and WordPress. Strong expertise in building robust APIs, modern front-end interfaces, and efficient back-end systems. Experienced in integrating AI-driven solutions, including intelligent automation, chatbot systems, and AI-powered features to enhance user experience and streamline business processes. Proven ability to deliver high-performance, responsive applications while adhering to SOLID principles and PSR coding standards. Recognized for strong problem-solving skills, effective time management, and the ability to lead and collaborate in fast-paced, agile environments.

EXPERIENCE

Full Stack Software Developer **Feburary 2025 – Present**

Smart Global AI Solutions , Dubai UAE

- Design and develop scalable web applications using React.js, Laravel, and modern JavaScript frameworks.
- Build and maintain RESTful APIs and GraphQL services to support web and mobile applications.
- Develop and optimize backend systems, ensuring high performance, security, and scalability.
- Create cross-platform mobile applications using React Native with real-time data integration.
- Integrate third-party APIs and services to enhance application functionality and user experience.
- Integrate AI-powered features such as intelligent search, recommendation systems, and workflow automation.
- Develop and implement AI chatbot solutions to automate customer interactions and improve engagement.
- Utilize AI/NLP APIs (e.g., OpenAI) for text generation, summarization, and smart suggestions.
- Design backend logic for AI-driven decision-making systems and dynamic data processing.
- Implement AI-based analytics and reporting features to provide actionable business insights.
- Deploy and manage applications using Docker and CI/CD pipelines for efficient delivery.
- Maintain code quality using SOLID principles and PSR standards, improving maintainability and reducing bugs.
- Collaborate within agile teams to deliver features incrementally and meet project deadlines.

Full Stack Developer **April 2021 – Jan 2025**

3Amigos, Lahore

- Developed scalable web applications using Laravel, Symfony, and front-end frameworks like ReactJS and VueJS, reducing page load times by 30%.
 - Ensured code quality by adhering to SOLID principles and PSR coding standards, improving maintainability and reducing debugging time by 20%.
- Designed and managed MySQL databases, creating optimized ERDs that enhanced query performance by 25%.

- Integrated APIs for seamless data flow between interfaces and servers, improving data synchronization by 40%.
- Deployed applications using Jenkins, Docker, and CI/CD pipelines, reducing deployment time by 50%.
- Optimized cross-browser compatibility for applications, achieving 98% responsiveness across diverse devices.

PHP Developer

February 2020 – April 2021

Inertia, Lahore

- Developed and deployed 10+ dynamic web applications using Core PHP, HTML, CSS, JQuery, and Bootstrap, enhancing system efficiency by 25%.
- Converted over 50 PSD designs into fully responsive, pixel-perfect websites, increasing user engagement by 30% and reducing bounce rates.
- Implemented new features and guided website architecture design.
- Wrote clean, testable, and efficient code following best practices, reducing error rates by 15% and streamlining development workflows.
- Successfully collaborated with 20+ clients to deliver tailored web solutions, achieving a 95% client satisfaction rate through customized functionality and design.

Business Developer and Project Manager

October 2020 – December 2021

Viltco Technologies, Lahore

- Conducted client meetings to gather 100% accurate technical requirements, minimizing scope creep in projects.
- Managed budgets for 15+ projects, delivering within timelines and maintaining a 98% on-budget rate.
- Tracked milestones and handled change requests effectively, improving project completion rates by 25%.

SKILLS

Languages & Frameworks:

PHP (Core PHP, Laravel, CodeIgniter), JavaScript (ES6+) , TypeScript, React.js, Vue.js, React Native
HTML5, CSS3, Bootstrap, Tailwind CSS, Node.js, Angular

Backend & API Development:

RESTful API Development, GraphQL, API Integration (3rd Party Services), Authentication (JWT, OAuth, Social Login), Payment Gateway Integration

AI & Modern Technologies:

AI API Integration (OpenAI / NLP APIs), Chatbot Development & Automation, Intelligent Search & Recommendation Systems, AI-based Content Generation & Summarization, Prompt Engineering (Basic to Intermediate)

Performance & Architecture:

Scalable Application Design, Code Optimization & Debugging, SOLID Principles & PSR Standards, Cross-Browser & Responsive Design

Databases:

MySQL, MongoDB, Database Design (ERD, Optimization)

DevOps & Tools:

Docker, CI/CD Pipelines, Git & GitHub, Jenkins

EDUCATION

Riphah International University, Lahore, Pakistan	2020 – 2022
Master of Science in Computer Science (MSCS)	
National University of Modern Languages, Islamabad, Pakistan	2015 – 2019
Bachelor of Software Engineering (BSSE)	

LANGUAGES

English	Fluent
Urdu	Native
